

boundaries of the waters of the United States. For example, changing sea levels or subsidence of land may cause some areas to become waters of the United States while siltation or a change in drainage may remove an area from waters of the United States. Man-made changes may affect the limits of waters of the United States; however, permanent changes should not be presumed until the particular circumstances have been examined and verified by the district engineer. Verification of changes to the lateral limits of jurisdiction may be obtained from the district engineer.

PART 329—DEFINITION OF NAVIGABLE WATERS OF THE UNITED STATES

Sec.

- 329.1 Purpose.
- 329.2 Applicability.
- 329.3 General policies.
- 329.4 General definition.
- 329.5 General scope of determination.
- 329.6 Interstate or foreign commerce.
- 329.7 Intrastate or interstate nature of waterway.
- 329.8 Improved or natural conditions of the waterbody.
- 329.9 Time at which commerce exists or determination is made.
- 329.10 Existence of obstructions.
- 329.11 Geographic and jurisdictional limits of rivers and lakes.
- 329.12 Geographic and jurisdictional limits of oceanic and tidal waters.
- 329.13 Geographic limits: Shifting boundaries.
- 329.14 Determination of navigability.
- 329.15 Inquiries regarding determinations.
- 329.16 Use and maintenance of lists of determinations.

AUTHORITY: 33 U.S.C. 401 *et seq.*

SOURCE: 51 FR 41251, Nov. 13, 1986, unless otherwise noted.

§ 329.1 Purpose.

This regulation defines the term “navigable waters of the United States” as it is used to define authorities of the Corps of Engineers. It also prescribes the policy, practice and procedure to be used in determining the extent of the jurisdiction of the Corps of Engineers and in answering inquiries concerning “navigable waters of the United States.” This definition does not apply to authorities under the

Clean Water Act which definitions are described under 33 CFR parts 323 and 328.

§ 329.2 Applicability.

This regulation is applicable to all Corps of Engineers districts and divisions having civil works responsibilities.

§ 329.3 General policies.

Precise definitions of “navigable waters of the United States” or “navigability” are ultimately dependent on judicial interpretation and cannot be made conclusively by administrative agencies. However, the policies and criteria contained in this regulation are in close conformance with the tests used by Federal courts and determinations made under this regulation are considered binding in regard to the activities of the Corps of Engineers.

§ 329.4 General definition.

Navigable waters of the United States are those waters that are subject to the ebb and flow of the tide and/or are presently used, or have been used in the past, or may be susceptible for use to transport interstate or foreign commerce. A determination of navigability, once made, applies laterally over the entire surface of the waterbody, and is not extinguished by later actions or events which impede or destroy navigable capacity.

§ 329.5 General scope of determination.

The several factors which must be examined when making a determination whether a waterbody is a navigable water of the United States are discussed in detail below. Generally, the following conditions must be satisfied:

- (a) Past, present, or potential presence of interstate or foreign commerce;
- (b) Physical capabilities for use by commerce as in paragraph (a) of this section; and
- (c) Defined geographic limits of the waterbody.

§ 329.6 Interstate or foreign commerce.

(a) *Nature of commerce: type, means, and extent of use.* The types of commercial use of a waterway are extremely varied and will depend on the character
